SIERRA LEONE

## AN ORTHOPEDIC CENTRE FOR WAR SURVIVORS IN SIERRA LEONE

Construction of an innovative orthopedic centre equipped with machinery and materials

**Duration:**

January 2025 - December 2027

**Location:**

Port Loko District, Sierra Leone

**Beneficiaries:**

Up to 600 people with disabilities and more than 3,000 indirect beneficiaries

**Partner:**

SLASA - Single Leg Amputee Sports Association

**Area of intervention:**

Ability in physical rehabilitation

SwissABILITY collaborates with the local association SLASA to realize the construction of a new orthopedic centre in the Port Loko District, Sierra Leone, so that people with disabilities in the region, including many survivors of the civil war, can access advanced orthopedic and physiotherapy services at subsidized prices.

Over the course of the three-year project, in particular, the provision of rehabilitative services will be ensured for at least 600 users.

The project includes:

- Construction of an orthopedic centre powered by solar panels.
- Supply of machinery and materials for the manufacture of prostheses and orthoses.
