RE-ABILITY BENIN

Supply of orthopedic materials and components for the manufacturing of prostheses

Location: Parakou, Benin

Partner: A2D Prosthetics, Parakou

Area of intervention: Ability in physical rehabilitation

The rehabilitation situation in Benin is particularly critical, mainly due to the fact that the healthcare system is fee-based, which excludes a large portion of families from accessing treatment, as it's too expensive for the majority of the population.

Moreover, accessible infrastructure and nearby materials for the production of prosthetics and orthotics are lacking.

In 2023, SwissABILITY intervened by donating materials and other components to the A2D Prosthetics orthopedic centre in Parakou, to provide services for at least 50 amputees in need of care.
